PROFILE

B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Android development, embedded firmware development, and machine learning. Proficient in Kotlin, Python, and C, with practical experience in Jetpack Compose, Kotlin Multiplatform (KMP), firmware debugging, UI testing, and collaborative software development using Git.

TECHNICAL SKILLS

Programming Languages: C, Python, Kotlin

Android Development: Kotlin, Android Studio, Jetpack Compose, Kotlin Multiplatform (KMP), UI Testing

Machine Learning: TensorFlow, Keras, Scikit-learn, XGBoost, Data Preprocessing, Feature Engineering, Model Evaluation, Deep Learning, NLP

Embedded Systems: Embedded C, Firmware Development, Sensor Integration, BLE, Firmware Flashing, Debugging, Device Testing

Tools: Git, GitHub, Docker, PostgreSQL, VS Code, SEGGER J-Link

Operating Systems: Linux, Windows

PROFESSIONAL EXPERIENCE

Embedded Software Engineer — Wisilica India Pvt. Ltd.

Dec 2025 – Present

- Developed embedded firmware in C for BLE-enabled microcontroller-based systems.
- Performed firmware flashing, debugging, sensor integration, and functional validation of embedded devices.
- Collaborated with cross-functional teams to troubleshoot hardware-software issues.

Android Developer Intern — Wisilica India Pvt. Ltd.

May 2025 – Dec 2025

- Developed Android UI using Kotlin, Jetpack Compose, and Kotlin Multiplatform (KMP).
- Performed UI testing and debugging to improve application quality.
- Collaborated with development teams in an Agile environment.

Cyber Security Intern — Spectrum Soft Tech Solutions

May 2023

- Gained practical exposure to ethical hacking and penetration testing using Kali Linux tools.

PROJECTS

InsightForge: Streamlined Data Analysis and Model Selection

Apr 2025

- Developed a web-based tool that simplifies the ML workflow by automating data preprocessing, feature engineering, model selection, and evaluation. Implemented data augmentation (SMOTE, ADASYN), outlier handling, and real-time prediction with visual performance metrics.
- **Technologies:** Python, NumPy, Pandas, Scikit-learn, XGBoost, TensorFlow, SpaCy, HTML, CSS, JavaScript, PostgreSQL, Docker

Hospital Management Bot

May 2024

- Developed a Flask-based web application integrating three functionalities: a specialist prediction system, a hospital chatbot, and a real-time appointment booking system.
- **Technologies:** Python, Flask, HTML, CSS, JavaScript

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

2025

Ilahia College of Engineering and Technology

Higher Secondary Education in Computer Science

2021

St. John's Higher Secondary School
